

End-of-Sale Announcement for Extreme Networks Distributors, Partners, and Sales Defender for IoT and Defender Adapter

Extreme Networks announces the end-of-sale of the Extreme Networks Defender for IoT application and the SA201 Defender Adapter. While there is no direct replacement to Defender for IoT, ExtremeCloud™ IQ Controllers continue to offer integrated policy enforcement per device for securing wired and wireless devices, including device grouping and rule based policy to group assignment.

For native Wi-Fi cloud deployments, ExtremeCloud IQ Pilot Essentials includes the cloud-native ExtremeloT application - a solution that enables network operators to protect and report on their network IoT devices.

The SA201 Defender Adapter can be replaced with the AP302W AP platform in most scenarios.

This announcement DOES NOT impact availability of the ExtremeCloud IQ Pilot Essentials – ExtremeloT application!
