1. The availability of each individual part is “while supplies last”, and supply of any module is not guaranteed through the End of Sale date.
2. Support services for the parts defined in this announcement are “Service Associated” with the chassis or module in which they are used. The EOSL date shown above for SKUs indicated in Table 1 reflects extension of the standard EOSL date to enable service association with chassis/modules which have not yet been announced for EOS. During the support period, Return Merchandise Authorization (RMA) replacements will use EOS SKUs if available, after which the equivalent new replacement SKUs will be provided.
3. During the EOS notification period, certain parts may experience extended lead times.
4. The company name on the transceiver/cable and outside packaging may change to reflect “Extreme”. The device is otherwise identical to the part which had “Brocade” company name on the label/packaging.
