

COURSE OUTLINE: ExtremeCloud™ IQ Controller Advanced Configuration

ASSOCIATED BADGE

ExtremeCloud™ IQ Controller –
Advanced Configuration

COURSE DURATION

Instructor-Led: 1 Day
On-Demand: 3 hours

[REGISTER](#)

DELIVERY METHOD

Instructor-Led: In-person and virtual training sessions, both with hands-on lab activities.

On-Demand: Flexible, self-paced learning without hands-on lab activities.

COURSE OVERVIEW

The course covers how to manage applications in ExtremeCloud™ IQ Controller, such as Extreme Scheduler and AirDefense Base. It teaches how to leverage APIs and Postman to be able to create integrated solutions and how to create custom dashboards and reports to become more proactive.

WHO SHOULD ATTEND

This course is for partners and power users that want to be able to get the most value out of their investment in ExtremeCloud IQ Controller and other tools.

MANDATORY PREREQUISITE

Students should already possess a learning credential for ExtremeCloud IQ Controller – Installation and Configuration.

COURSE OBJECTIVES

Upon completion of this course, students will have gained the working knowledge to:

- Install and manage applications into ExtremeCloud IQ Controller
- Create custom reports and dashboards in ExtremeCloud IQ Controller
- Be able to call API to perform functions or retrieve data from ExtremeCloud IQ Controller

AGENDA

- Applications
- Custom dashboards and reports
- Application Programming Interface
- Advanced topologies
