COURSE OVERVIEW

Students will gain more detailed explanation of centralized network management capabilities within XIQ-SE. This includes not only built-in tools but also customizations available within XIQ-SE. Device firmware management, device configuration management, and device reporting are discussed. Students have these concepts reinforced with a hands-on lab experience working with a pre-configured network.

WHO SHOULD ATTEND

This course is designed for individuals responsible for the overall network management using XIQ-SE.

MANDATORY PREREQUISITE

Extreme Cloud IQ – Site Engine Installation and Configuration certification is a mandatory prerequisite for this course. The XIQ-SE courses are recommended to be taken in the following order: Installation and Configuration, Management, Advanced Configuration, and Troubleshooting. Students should possess an understanding of network fundamentals, and general network management concepts, as well as network security concepts and technologies.

In addition, Extreme Networks recommends the following courses prior to enrolling in the XIQ-SE courses:

- Campus Switching
- Extreme Cloud IQ – Controller (formerly Extreme Campus Controller (XCC)) or Wireless Core
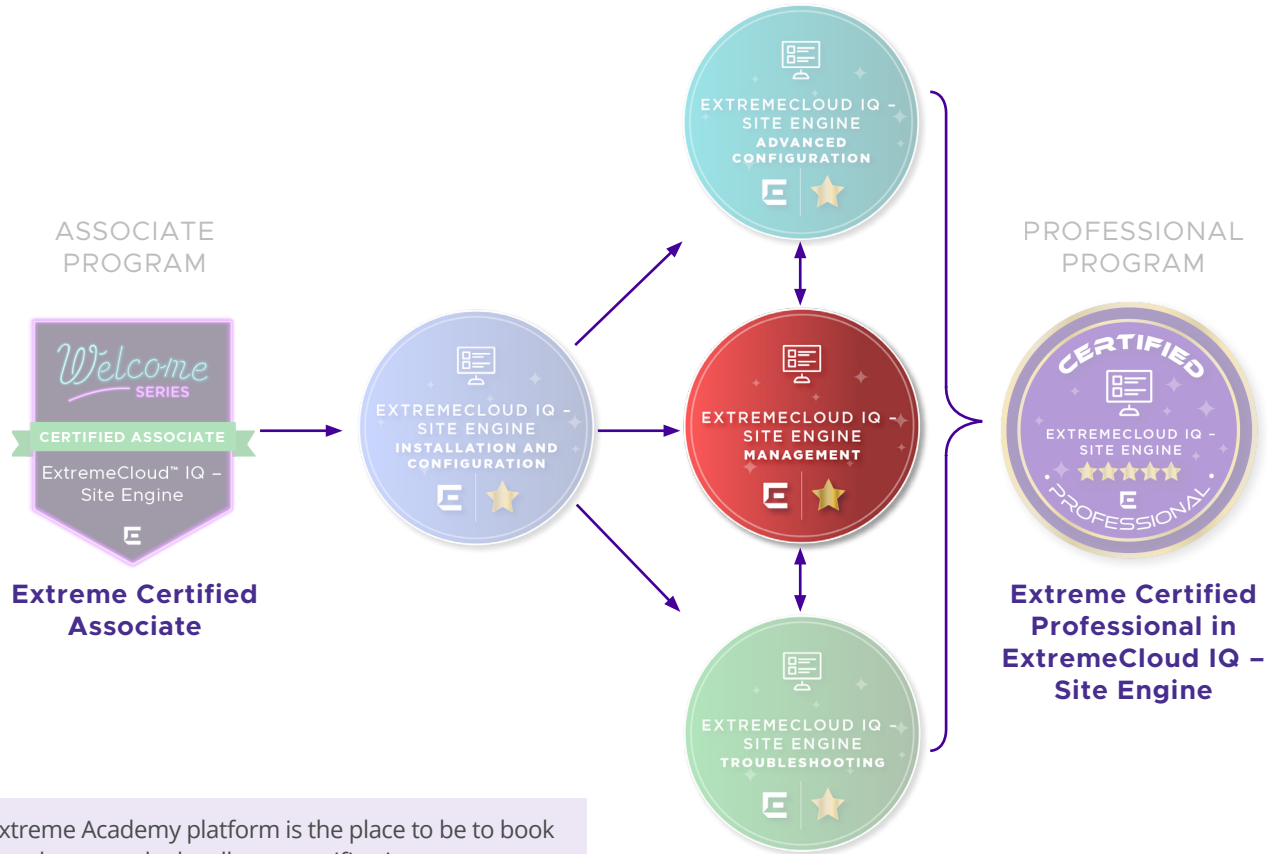

COURSE OBJECTIVES

Upon completion of this course, students will have gained the working knowledge to:

- Manage device firmware via XIQ-SE
- Create and manage device configuration archives
- Access, generate, and customize reports in XIQ-SE
- Take the XIQ-SE – Management Exam

AGENDA

- XIQ Integration
- Wireless
- Firmware Management
- Archive Management
- Reports
