COURSE OVERVIEW

In this series, students will be looking at the latest addition to the Extreme Networks family, ExtremeCloud SD-WAN. We start by getting down to the very basics of what SD WAN is all about and how it came to become a really integral part of any network.

We'll look at features such as Application control, Application visibility, WAN optimization, management and security. Finally, we'll wrap it all up with a demo to show students how fantastic this technology is. Don't forget to look out for the David and Isaac one-to-one for some great bonus content!

WHO SHOULD ATTEND

This course is designed for individuals who are new to the field of network management, or those who have some experience and want to enhance their knowledge and skills.

COURSE OBJECTIVES

- Upon completion of this course, you will be able to complete the FREE certification exam which will award you the Extreme Certified Associate in ExtremeCloud SD-WAN digital badge.
