When we speak of free offcare, we are referring to freedom, not price. Our describ Modific Licenses are designed to make arm that you have the freedom to receive course code or can get it five usent it, that you can do there of the programs or use pieces of it in new free programs, and that you know you can do these things.
             To protect your rights, we need to prevent others from denying you these rights or asking you to surrender the rights. Therefore, you have certain respecialities if you distribute copies of the software, or if you modify it: respecialities to respect the freedom of others.
             For example, if you distribute copies of such a program, whether gratis or for a fee, you must pass on to the recipients the same freedoms that you received. You must make sure that they, too, receive or can get the source code. And you must show then these there so they know their rights.
      Developers that use the GNE GPG protect your rights with two steps: (1) assert copyright to the software, and (3) offer you this license giving you legal permission to copy, distribute and/or modify it.
             For the developers' and authors' protection, the GPC clearly explains that there is no warranty for this free software. For both users' and authors' take, the GPC requires that modified versions be marked as changed, so that their problems will not be attributed erroneously to authors of previous versions.

To protect your rights, we need to prevent others from denying you these rights or asking you to surrender the rights. Therefore, you have certain responsibilities if you distribute copies of the software, or if you modify its responsibilities to respect the freedow of others. For example, if you distribute copies of such a program, whether gratis or for a fee, you must pass on to the recipients the same freedoms that you received. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

Developers that use the GRU GPL protect your rights with two steps: (1) assert copyright on the software, and (2) offer you this License giving you legal newsision to copy, distribute and/or modify it.

for the developers' and authors' protection, the GPG clearly explains that there is no surrounty for this free software.
