## 5420 Series

## Highlights

- Intuitive and centralized cloud-managed switching with ExtremeCloud ${ }^{\top}$ M IQ and ExtremeCloud IQ - Site Engine
- Fabric-enabled operations with Extreme Fabric Connect for simplified and secure network provisioning and automation
- Choice of operating system (OS) with universal dual-persona hardware

Key Hardware Features

- Fixed 24 and 48-port models with gigabit and multi-gigabit support
. 30W, 60W, and 90W PoE (Power over Ethernet) support for powering connected devices
. $4 \times 7 / 10 G b$ SFP + or $4 \times 7 / 10 / 25 G b$ built-in uplink ports
- 80Gb per unit stacking of up to eight switches
- Secure link encryption with MACsec across both access and uplink ports
- Non-blocking wire speed design

## Universal Edge Switch Platform

The 5420 Series is a family of high-performance, feature-rich, stackable edge switches designed for the next-generation digital enterprise. Available in 24 and 48-port models, the 5420 features both gigabit and multi-gigabit ( $7 / 2.5 \mathrm{G}$ ) versions with up to 90 W PoE enabling it to be deployed across a range of edge and wiringcloset environments. As a universal hardware platform, the 5420 also offers a userselectable choice of Extreme's flagship switch operating systems for a uniquely flexible platform.

The 5420 Series consists of 5420 M and 5420F families to address a variety of end-user needs and price points. 5420M models offer field-replaceable power supplies and fans as well as four 1/10/25Gb built-in uplink ports, while 5420F models offer fixed power supply (with support for a second field-replaceable power supply), fixed fans, and four $1 / 10 \mathrm{~Gb}$ built-in uplink ports. All models provide 30/60/90W PoE capabilities making them an ideal wired back end for wireless APs or in support of Next Gen powered Ethernet devices, such as digital signage, pan-tilt-zoom cameras, smart lighting, or point-of-sale terminals.

## Universal Hardware Platform

The 5420 comes with a dual-persona capability, allowing you to choose your OS. Either the Switch Engine (EXOS) ${ }^{1}$ or Fabric Engine (VOSS) ${ }^{2}$ OS can be selected at switch start-up or changed at a later stage. When selected, the switch assumes the features and capabilities of that OS.

5420 OS selection can also be automated with ExtremeCloud IQ so that the desired OS can be automatically loaded at switch start-up, facilitating remote OS enablement.
${ }^{1}$ Switch Engine is the new name for ExtremeXOS (EXOS) on all universal switch platforms, starting with Version 31.6.
${ }^{2}$ Fabric Engine is the new name for the VSP Operating System Software (VOSS) on all universal switch platforms, starting with Version 8.6.

## Ethernet Fabric Services

The 5420 supports a variety of Ethernet Fabric services, including Extreme's Fabric Connect when running Fabric Engine and Extreme's IP Fabric when running Switch Engine. It also supports Fabric Attach for automated connection to either Layer 2 or Layer 3 Fabric services.

Extreme's Fabric Connect and IP Fabric enable the creation of virtualized networks that automate network operations, simplify network provisioning, and enhance security, all while reducing the strain on network and IT personnel.

## Power over Ethernet (PoE)

All 5420 models support 30W, 60W, and 90W PoE that conforms with IEEE 802.3bt. This enables the 5420 to address the needs of powered edge devices, while eliminating the need for additional electrical cabling and circuits. In addition, 5420 PoE models support perpetual and fast PoE for even more efficient and reliable powered edge device operation

## MACsec Link Encryption

IEEE 802.1AE MACsec* is supported on 5420 access and built-in uplink ports, enabling the encryption and decryption of packets between connected switches or devices. As a link-only encryption, 5420 switches can still apply services to the packet, such as policy or QoS, without compromising the security of packets across the link. With 128-bit and 256 -bit Advanced Encryption Standard (AES) support, the 5420 provides the most secure link encryption.

* Supported on specific hardware revisions; please refer to the 5420 Hardware Installation Guide for details.

## High-Performance Stacking

The 5420 Series supports high-speed stacking when running Switch Engine via its two built-in SFP-DD stacking ports. Up to eight switches can be stacked using qualified SFP+/SFP-DD direct attach cables and optical transceivers. Stacking is not supported when running Fabric Engine.

## Audio Video Bridging

The 5420 Series supports IEEE 802.1 Audio Video Bridging (AVB) when running Switch Engine OS . This allows 5420 models to deliver reliable, real-time audio/ video transmission over Ethernet, meeting the quality of service required for today's high-definition, time-sensitive multimedia streams.

## Cloud-Based Network Management

The 5420 can be managed by ExtremeCloud IQ and ExtremeCloud IQ Site Engine for centralized switch management, giving you a consolidated view of users, devices, and applications across wired and wireless networks for efficient inventory and network topology management. ExtremeCloud IQ enables zero touch provisioning, allowing you to quickly bring new 5420 switches online as well as select the OS persona.

Alternatively, 5420 on-box management can be done manually via a webbased GUI or generic command-line interface (CLI).

## External Interfaces

| Switch Model | Interfaces |

* Notes on use of the $2 \times$ Stacking/SFP-DD ports

1. With Switch Engine, the $2 \times$ SFP-DD ports can used either for stacking or as Ethernet uplink ports (when not stacking).
2. With Fabric Engine, the $2 \times$ SFP-DD ports can be used as Ethernet uplinks when in non-Fabric mode.
3. SFP-DD ports support either 10 Gb or 20 Gb data rates with the use of appropriate transceivers/cables.
4. When used as uplinks, 5420 M models support up to $2 \times 10 G b$ channels on each SFP-DD port
5. When used as uplinks, 5420F models support a single $10 G b$ channel on each SFP-DD port.

* Includes $2 \times 1 / 10 G$ ports available using the SFP-DD ports when these ports are not used for stacking with Switch Engine, or when in non-Fabric mode with Fabric Engine
** Includes $4 \times 1 / 10 G b$ ports available through channelization of the $2 \times$ SFP-DD ports when these ports are not used for stacking with Switch Engine, or when in non-Fabric mode with Fabric Engine. It also includes the $4 \times$ SFP28 uplink ports when run at $1 / 10 G b$
*** Switch Engine only: 20Gb stacking requires SFP-DD transceivers/cables; 10Gb stacking supported using SFP+ transceivers/cables

## 5420F Internal Fixed and Secondary Power Supply Options

| Model | Internal Fixed Power Supply Unit (PSU)* | Secondary Power Supply Unit (PSU)** |
| :---: | :---: | :---: |
| 5420F-24T-4XE | 120W AC PSU | XN-ACPWR-150W or |
| XN-ACPWR-150W-FB |  |  |

* Internal Fixed PSU is non-orderable and comes pre-installed with each 5420F model
${ }^{* *}$ Secondary PSU provides power redundancy in 5420F non-PoE models and enables maximum PoE Power Budget in $5420 F$ PoE models (see table below). Model/PSU combinations other than those listed above are blocked physically or in software.

## 5420F PoE Power Budget

| Model | PoE Budget with Single Internal Fixed PSU | PoE Budget with Recommended Secondary PSU |
| :---: | :---: | :---: |
| $5420 \mathrm{~F}-24 \mathrm{P}-4 \mathrm{XE}$ | 380 W | 720 W |
| $5420 \mathrm{~F}-48 \mathrm{P}-4 \mathrm{XE}$ | 740 W | 1480 W |
| $5420 \mathrm{~F}-48 \mathrm{P}-4 \mathrm{XL}$ | 740 W | 1480 W |
| $5420 \mathrm{~F}-8 \mathrm{~W}-16 \mathrm{P}-4 \mathrm{XE}$ | 480 W | 960 W |
| $5420 \mathrm{~F}-16 \mathrm{~W}-32 \mathrm{P}-4 \mathrm{XE}$ | $872 \mathrm{~W}^{*} / 960 \mathrm{~W}^{* *}$ | $1437 \mathrm{~W}^{* / 1874 W^{* *}}$ |
| $5420 \mathrm{~F}-16 \mathrm{MW}-32 \mathrm{P}-4 \mathrm{XE}$ | $860 \mathrm{~W}^{*} / 960 \mathrm{~W}^{* *}$ | $1425 \mathrm{~W}^{*} / 1862 \mathrm{~W}^{* *}$ |

* @ 100-120 VAC
** @ 200-240 VAC

## 5420M Primary and Secondary Power Supply Options

| Model | Primary Power Supply Unit (PSU)* | Secondary Power Supply Unit (PSU)* |
| :---: | :---: | :---: |
| $5420 \mathrm{M}-24 \mathrm{~T}-4 \mathrm{YE}$ | XN-ACPWR-150W or <br> XN-ACPWR-150W-FB | XN-ACPWR-150W or |
| XN-ACPWR-150W-FB |  |  |

* Primary PSU is required; Secondary PSU provides power redundancy and enables maximum PoE Budget in 5420M PoE models (see table below). Model/PSU combinations other than those listed above are blocked physically or in software.

## 5420M PoE Power Budget

| Model | Power Supply | PoE Budget with Single Primary PSU | PoE Budget with Optional Secondary PSU |
| :---: | :---: | :---: | :---: |

## Environmental

## Environmental Specifications

EN/ETSI 300 019-2-1 v2.1.2 - Class 1.2 Storage
EN/ETSI 300 019-2-2 v2.1.2 - Class 2.3 Transportation
EN/ETSI 300 019-2-3 v2.1.2 - Class 3.1e Operational
EN/ETSI 300753 (1997-10) - Acoustic Noise
ASTM D3580 Random Vibration Unpackaged 1.5 G

## Environmental Compliance

EU RoHS - 2011/65/EU
EU WEEE - 2012/19/EU
EU REACH - Regulation (EC) No 1907/2006 Reporting
China RoHS - SJ/T 11363-2006
Taiwan RoHS - CNS 15663(2013.7)

## Environmental Operating Conditions

Temp: $0^{\circ} \mathrm{C}$ to $50^{\circ} \mathrm{C}\left(32^{\circ} \mathrm{F}\right.$ to $122^{\circ} \mathrm{F}$ )
Humidity: 5\% to $95 \%$ relative humidity, non-condensing
Altitude: 0 to 3,000 meters (9,850 feet)
Shock (half sine) $30 \mathrm{~m} / \mathrm{s} 2$ (3G), $11 \mathrm{~ms}, 60$ shocks
Random vibration: 3 to 500 Hz at 1.5 G rms

## Packaging and Storage Specifications

Temp: $-40^{\circ} \mathrm{C}$ to $70^{\circ} \mathrm{C}\left(-40^{\circ} \mathrm{F}\right.$ to $\left.158^{\circ} \mathrm{F}\right)$
Humidity: 5\% to 95\% relative humidity, non-condensing
Packaged Shock (half sine): $180 \mathrm{~m} / \mathrm{s} 2$ ( 18 G ), $6 \mathrm{~ms}, 600$ shocks
Packaged Vibration: 5 to 62 Hz at velocity $5 \mathrm{~mm} / \mathrm{s}, 62$ to 500 Hz at 0.2 G
Packaged Random Vibration: 5 to 20 Hz at 1.0 ASD w/-3 dB/oct. from 20 to 200 Hz

Packaged Drop Height: 14 drops minimum on sides and corners at 42 inches (<15 kg box)

## Regulatory and Safety

## North American ITE

UL 60950-1
UL/CuL 62368-1 Listed
CSA 22.2 No. 60950-1 2nd edition 2014 (Canada)
Complies with FCC 21CFR 1040.10 (U.S. Laser Safety)
CDRH Letter of Approval (US FDA Approval)

## European ITE

EN 60950-1 2nd Edition
EN 62368-1
EN 60825-1Class 1 (Lasers Safety)
2014/35/ EU Low Voltage Directive

## International ITE

CB Report \& Certificate per IEC 60950-1
CB Report \& Certificate IEC 62368-1
AS/NZS 60950-1 (Australia /New Zealand)

## EMI/EMC Standards

North American EMC for ITE
FCC CFR 47 Part 15 Class A (USA)
CES-003 Class A (Canada)

European EMC Standards
EN 55032 Class A
EN 55024
EN 61000-3-2,2014 (Harmonics)
EN 61000-3-3 2013 (Flicker)
EN 300386 (EMC Telecommunications)
2014/30/EU EMC Directive

International EMC Certifications
CISPR 32, Class A (International Emissions)

IEEE 802.3az Energy Efficient Ethernet

## Ordering Notes

Customers ordering a 5420F Series switch receive the hardware switch along with Base software license, integrated power supply, fan modules and rack-mount kit. 5420M Series switch customers receive the same components, except for power supplies which are not included with the unit.

At least one Power Supply Unit (PSU) is required for 5420M operation. Additional power supplies (either for 5420For 5420M switches), transceiver/optics, power cords, as well as Premier and/or MACsec licenses must be ordered separately.

## Base Software and Optional Premier License

The Base software included with each 5420 unit supports most available software features. Certain features, however, require a Premier License to operate.

## For Switch Engine, a Premier License is required for:

5 or more OSPF interfaces
PIMDM/PIM SSM
Anycast RP (Rendezvous Point)
MultiSource Discovery Protocol (MSDP)
IS-IS/BGP4/MBGP*
GRE Tunneling
Ethernet VPN (EVPN)

## For Fabric Engine, a Premier License is required for:

5 or more OSPF active interfaces
3 or more BGP Peers
Layer 3 Virtual Service Networks (L3 VSNs)

## Software Licenses

| Part Number | Product Name | Description |
| :---: | :---: | :---: |
| 5000-PRMR-LIC-P | Premier License for 5000 Series | Perpetual Premier License for 5000 Series switches |
| 5000-MACSEC-LIC-P | MACsec License for 5000 Series | Perpetual MACsec license for 5000 Series switches |

## Warranty

All 5420 Series models are covered under Extreme's Universal LLW policy. For warranty details, visit our Policies and Warranties page.

## Optics/Transceivers

For a list of the optics and transceivers supported on the 5420 Series hardware, refer to our Extreme Optics Compatibility Tool.

## Power Cords

Power cords are not included with the 5420 in support of our green initiatives but can be ordered separately.

## Maintenance Services

Extreme's maintenance and support services are provided 100\% by inhouse engineering experts. We have a rate of over $90 \%$ first-person resolution, ensuring efficient operation of your business-essential network.

With $24 \times 7 \times 365$ phone support, advanced parts replacement, and on-site support, we augment your staff with expert resources to help you mitigate critical network issues fast. Visit our ExtremeWorks Maintenance Services for more information.

## Certifications

For information on Industry, Security, and Government certifications for 5420 Series models, contact your Sales Representative.

[^0]:    * Measured weight includes fan (XN-FAN-OOO) and PSU cover(s), but does not include optional power supply unit(s).

[^1]:    * Includes maximum PoE load (W) through the switch
    **Does not include PoE load heat dissipated through external electronic load

[^2]:    * Noise measurements are based on operational tests conducted at $25^{\circ} \mathrm{C}\left(77^{\circ} \mathrm{F}\right)$ in compliance with ISO 7779
    ** $5420 \mathrm{M}-48 \mathrm{~W}-4 \mathrm{YE}$ and $5420 \mathrm{M}-16 \mathrm{MW}-32 \mathrm{P}-4 \mathrm{YE}$ results using 2000 W PSUs (XN-ACPWR-2000W)
