Dear Brocade Customer,

This letter is a formal notification that Brocade is initiating the End of Life (EOL) process for the 32-slot models of the Brocade® NetIron® MLX® (non-E chassis only) and Brocade NetIron XMR and for the Brocade NetIron Packet over SONET/SDH (POS) Modules and Optics and certain Field Replaceable Units (FRU) of the Brocade NetIron MLX and XMR Series. Pursuant to the terms of your agreement with Brocade, this letter serves as your formal written EOL notification, which will allow for appropriate planning and opportunity for last time purchases.

The recommended product replacement for the Brocade MLX-32 chassis is the Brocade MLXe-32 chassis and for the Brocade XMR-32 chassis the replacement is the Brocade MLXe-32 chassis. For a smooth transition to the Brocade MLXe-32 chassis, all MLX and XMR interface modules, management modules, high-speed switch fabric modules, and power supplies are also supported on the Brocade MLXe-32 chassis. Consult your account management team or refer to the product installation guide for more details.

In the last few years, the market has moved rapidly towards high-speed Ethernet interfaces and this pace is accelerating in the future. Brocade is therefore announcing End of Sale of the POS modules and POS optics to focus investment towards developing highly scalable and advanced Ethernet interfaces. Brocade urges customers migrating from SONET/SDH to Ethernet to consult with their Brocade account management team on a smooth transition to Ethernet.

Brocade will continue to offer and provide support for the EOL products five (5) years from the Last Customer Ship Date (LCS) below for those customers with a valid support contract. Note that the last software release supporting POS Modules is R5.2.00.

The objective of the Brocade account management team is to smoothly transition opportunities to the new products by planning to the following milestones:

Brocade MLX chassis, XMR chassis, POS Modules, POS Optics, FRUs
