

COURSE OUTLINE:

Extreme Certified Professional in ExtremeControl

ASSOCIATED CERTIFICATIONS

Extreme Certified Professional
in ExtremeControl

COURSE DURATION

1 Day

DELIVERY METHOD

Available as Classroom
Instructor-led training and Virtual
Instructor-led training.

ASSESSMENT OVERVIEW

Part one of the process to obtain the Professional Certification is an in-depth multiple-choice exam that tests all knowledge credential content. Successful completion of this exam allows the candidate to register for part two, which is a practical lab assessment.

This one-day assessment will again test all the knowledge and practical skills learned in the four knowledge credentials. The first part of the day is unstructured and will allow time for practice in the lab. The assessment will then take place and will be overseen by the assessing ATP. You will be given a number of lab exercises and scenarios to work through alone, before being marked at the end of the assessment.

ASSOCIATED COURSES

- ExtremeControl - Installation and Configuration
- ExtremeControl - Management
- ExtremeControl - Advanced Configuration
- ExtremeControl - Troubleshooting

WHO SHOULD ATTEND

Those who have completed all four knowledge credentials in a track and wish to achieve Extreme Certified Professional status.

MANDATORY PREREQUISITE

Students should already possess a learning credential for ExtremeControl - Installation and Configuration.

ASSESSMENT OBJECTIVES

The Extreme Certified Professional in ExtremeControl Exam must have been passed before taking the lab assessment. You will only have access to this exam once you have passed all four knowledge credentials.
