Multiple access points supported by Extreme Networks® have reached the end of their sales cycle. These access points are being replaced by newer 802.11ac radio technologies and recent changes in regulatory requirements impact the product availability and component shortages.

Due to new rules for regulatory compliance in the EMEA region the AP380x access points will not pass the EMEA Directive 2014/53/EU Radio Equipment Directive (RED) all EMEA countries for these access points will be closed on June 13, 2018.

Extreme Networks® is pleased to announce a new Wave 2 802.11ac Dual Radio 2x2:2 indoor access point to the ExtremeWireless portfolio for enterprise deployments to replace the end of sales WS-AP380x. The cloud-ready platforms are fully supported by ExtremeWireless™ V10.41.01 and higher
