Extreme E-Rate Eligibility

E-Rate Category	Required Capabilities	Extreme Solutions	How We Do It Better
Category 2 – Internal Connections	High Density, Pervasive Wi-Fi	• All wireless access points • Necessary accessories and antennas • Necessary right-to-use subscription licenses for ExtremeCloud™ IQ Pilot • All virtual wireless controllers • All hardware wireless controllers	• Highly scalable, seamless and secure Wi-Fi connectivity • Most scalable and resilient cloud orchestration • Flexible deployment options: on-premise, private, public cloud • Enhanced data retention in the public cloud • Simplified right-to-use licensing and integral universal LLW simplifies E-Rate filing processing
Category 2 – Internal Connections	Wired Edge and Backhaul	• All switches – Edge to Core • Necessary switching fan modules, power supply modules, and cables (each SKU filed as a separate line item - not bundled together) • Necessary core and connectivity licenses • Necessary right-to-use subscription licenses for ExtremeCloud IQ Pilot	• High performance wired backhaul, cross-platform stacking, embedded application controls • Hot swappable power supplies and fans • Most scalable and resilient cloud orchestration • Enhanced data retention in the public cloud • Simplified subscription licensing and integral universal LLW simplifies E-Rate filing processing
Category 2 – Managed Internal Broadband Services (MIBS)	Artificial Intelligence for IT Operations (AIOps)	• ExtremeCloud IQ CoPilot	• Enhanced AIOps streamlines IT daily activities • Leverages explainable machine learning (ML) to provide verifiable actions • Delivers better student outcomes via proactive problem identification
Category 2 – Basic Maintenance of Internal Connections (BMIC)	Services and Support	• Basic Maintenance • TAC and OS = 100% eligible • Advanced Hardware Replacement = 0% eligible	• Extreme Networks' Global Technical Assistance Center • Support Center (GTAC) provides technical support 24x7x365 • ExtremeWorks offerings let you choose the exact level of service ideal for your organization
Category 1 – Internet Access and Data Transmission Services	WAN Connectivity	• ExtremeCloud SD-WAN	• Highly-granular WAN optimization • Improved WAN performance • All-inclusive subscription packaging
Not Eligible	Control and Monitoring of Network and All Devices, Guest Access	• ExtremeControl • Extreme AirDefense	• Consistent device policy based on over 40 attributes centrally implemented, enforced end-to-end • Simple device onboarding, 100% fidelity of all IP assets • Internet filter and firewall integration, MDM integration, content filter integration for CIPPA Compliance.
